

Jiaming Meng

Great Neck, NY • (516) 912-3398 • jackmeng0814@gmail.com • www.exoad.net

Education

University of Maryland

A. James Clark School of Engineering

Major in Computer Engineering

The Pennsylvania State University

College of Engineering

Major in Computer Science

College Park, MD

Sept. 2025 – Present

GPA pending

University Park, PA

Aug. 2024 – May 2025

GPA: 3.7/4.0

Technical Skills

Mastery in: Java, Python, C, JavaScript, Kotlin, Dart/Flutter, Git, Linux

Familiar with: C++, React, SQL (MySQL), CMake, Firebase, TypeScript, LLVM, Skia

Projects

YttriusVM – C/C++, LLVM

2022 – 2023

<https://github.com/exoad/yttriuslang.c>

Development toolkit simplifying programming language creation by abstracting low-level concerns.

- Cross-platform deployment to 8 environments including web and mobile.
- Built with support for common tasks such as File I/O.

Halcyon – C/C++, Java

2021 – 2023

<https://github.com/exoad/Halcyon.c>

Cross-platform desktop media application with modern UI/UX designs.

- Designed modular audio engine that supports 30+ audio formats.
- Built GPU-accelerated UI library for Java with quicker response and lower latency.

Filewatch – Kotlin

2023 – Present

<https://github.com/exoad/Filewatch>

Automated file organization tool that eliminates repetitive workflows.

- GUI based workflow builder.
- 13 prebuilt workflows with extensible support for third-party integrations.

Kira – Kotlin, C

2025 – Present

<https://github.com/exoad/kira>

An object-oriented language that's easy to learn.

- Syntax similar to Python & C++.
- Built a friendly development tool to improve developer experience.

Nukleon – Flutter, Kotlin

2024 – Present

<https://github.com/exoad/nukleon>

2D simulation game on nuclear power management.

- Designed a custom rendering layer for drawing 2D textures and handling hardware-acceleration.
- Implemented a fast approximation algorithm to perform big number operations.
- Implemented a multi-threaded algorithm for processing high-volume data.

Leadership

FRC Rebel Robotics 2638

Great Neck South High School

Lead App Team Developer & Scouting Leader

2021 – 2024

- Built and maintained the app *2638 Scout*, achieving 15,000+ downloads across iOS and Android worldwide.
- Led 30+ team members to compete in 2 (2023, 2024) FRC World Championships in Houston, TX.

VEX Omega Robotics 1569A

Lead Programmer & Strategist

2021 – 2022

- Developed and tested robot control and autonomous systems written in C++.
- Responsible for testing and maintaining autonomous path planning with daily 5 to 6-hour sessions.
- Placed Top 25 in the world at the VEX Tipping Point Competition in Dallas, TX.
